# VNS Health Launches Integrated Mental Health & Addiction Treatment Clinic in the Bronx, New York

*Open Minds, April 25, 2025*

VNS Health opened a new integrated outpatient services (IOS) clinic to provide mental health and addiction treatment to serve the Bronx and the greater New York City region. The clinic serves youth, families, and adults. It provides coordinated mental health and addiction treatment, crisis intervention, and care coordination to connect consumers with broader health care and safety net services.

VNS Health obtaining certification and licensure as an IOS program enables the behavioral health professionals to treat both mental health and addiction disorders through a single point of contact to address co-occurring conditions. The clinic has no insurance restrictions. To increase the ease of consumer access, clinic hours are from Monday through Friday until 9 p.m., and on Saturdays until 6 p.m.

VNS Health was founded in 1893 to provide visiting nurse services. It currently provides home care and community programs, hospice care, personal care, behavioral health, and care management. It operates a research center, and offers a line of health plans for low-income people or those with disabilities who need long-term services and supports. It provides direct services across New York City's five boroughs and Long Island. Its health plans are available in 38 Upstate, Central and Western counties

***Open Minds tracks the news needed for strategic planning, marketing plan development and competitive analysis across the field. Helps visitors quickly spot the very latest trends in the behavioral health and social service fields. Provides information on behavioral health and on cross-over markets like children's services, MR/DD, senior services and social services from a single source. It reaches an estimated audience of 12,250.***
